Attachments: Ruggerone data for Albert.xlsx

Hi Dave,

Good talking with you today. Here's the table I got from Ruggerone via Michael Webster at Moore Foundation. I'll dig up the link to the Pinsky database and send that along as well.

Subject: Salmon data

Hi Dave,

Attached are the two original files I received from Becky who received them from Ruggerone. While the second two files ending with my initials should merely have additions to look at the data, with no changes to original data, thought it best to make sure you have originals. The major additions to the Brood tables are apportioning returns to years for total run size.

Thanks for your help.

Ruggerone data
